

"What is the proportion of bachelor's degrees earned by women in the College of Engineering?"

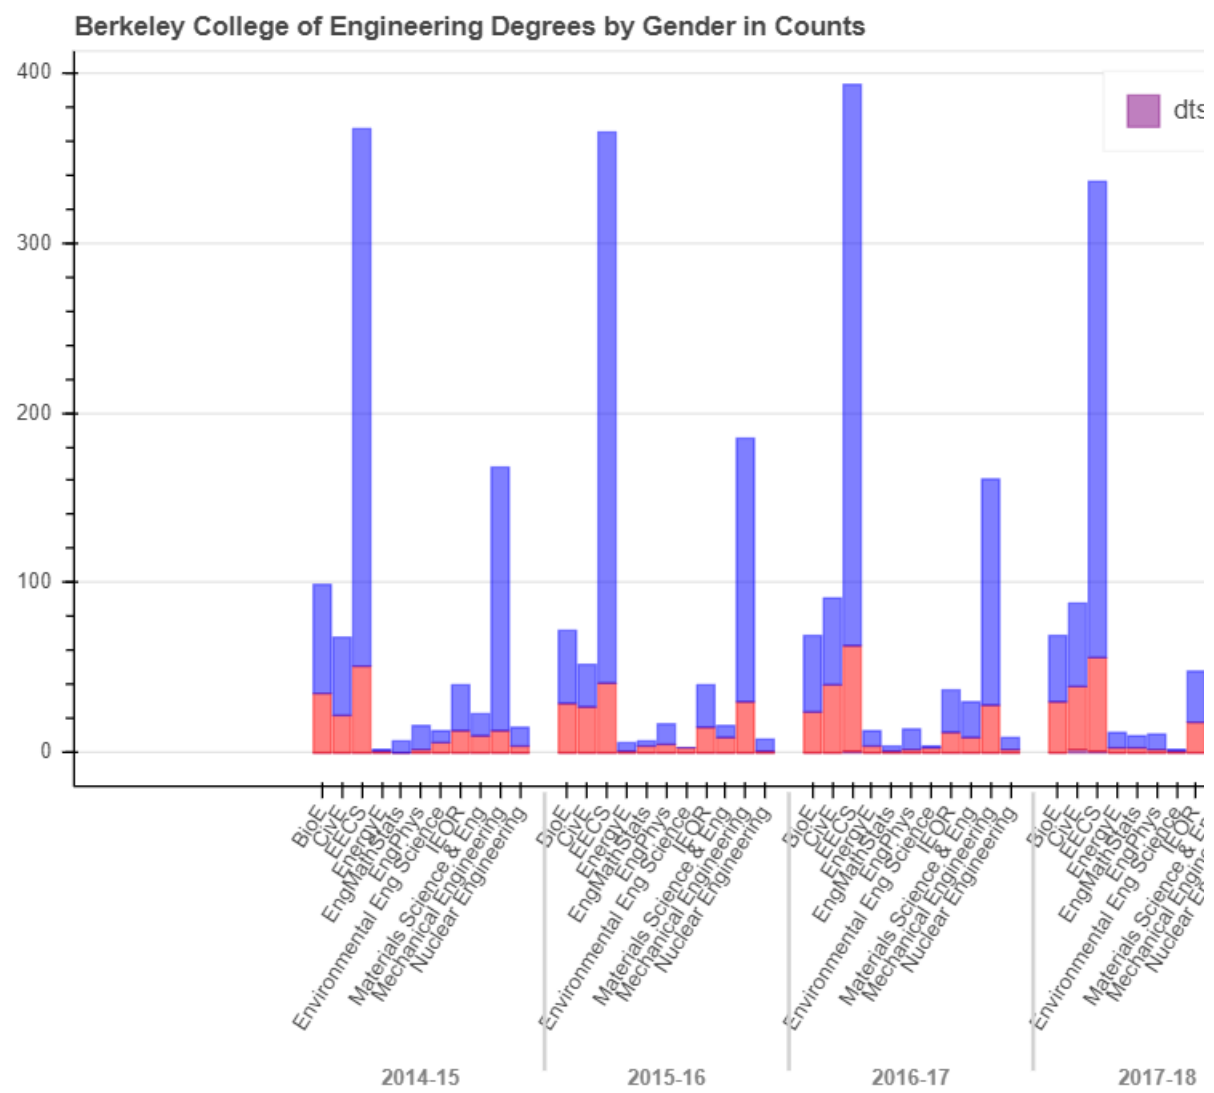

- [Raw Data from CalAnswers \(https://rtang18.github.io/engineering/engineering.csv\)](https://rtang18.github.io/engineering/engineering.csv)
- [Data Cleaning Notebook \(https://github.com/rtang18/WITI-RT/blob/master/engineering/engineering%20degrees%20by%20gender.ipynb\)](https://github.com/rtang18/WITI-RT/blob/master/engineering/engineering%20degrees%20by%20gender.ipynb)

Below are the College of Engineering degrees by Gender in counts and percentages. We can see that the four largest majors in the CoE are Bioengineering, Civil Engineering, Electrical Engineering & Computer Science, and Mechanical Engineering.

```
In [1]: from IPython.display import IFrame
```

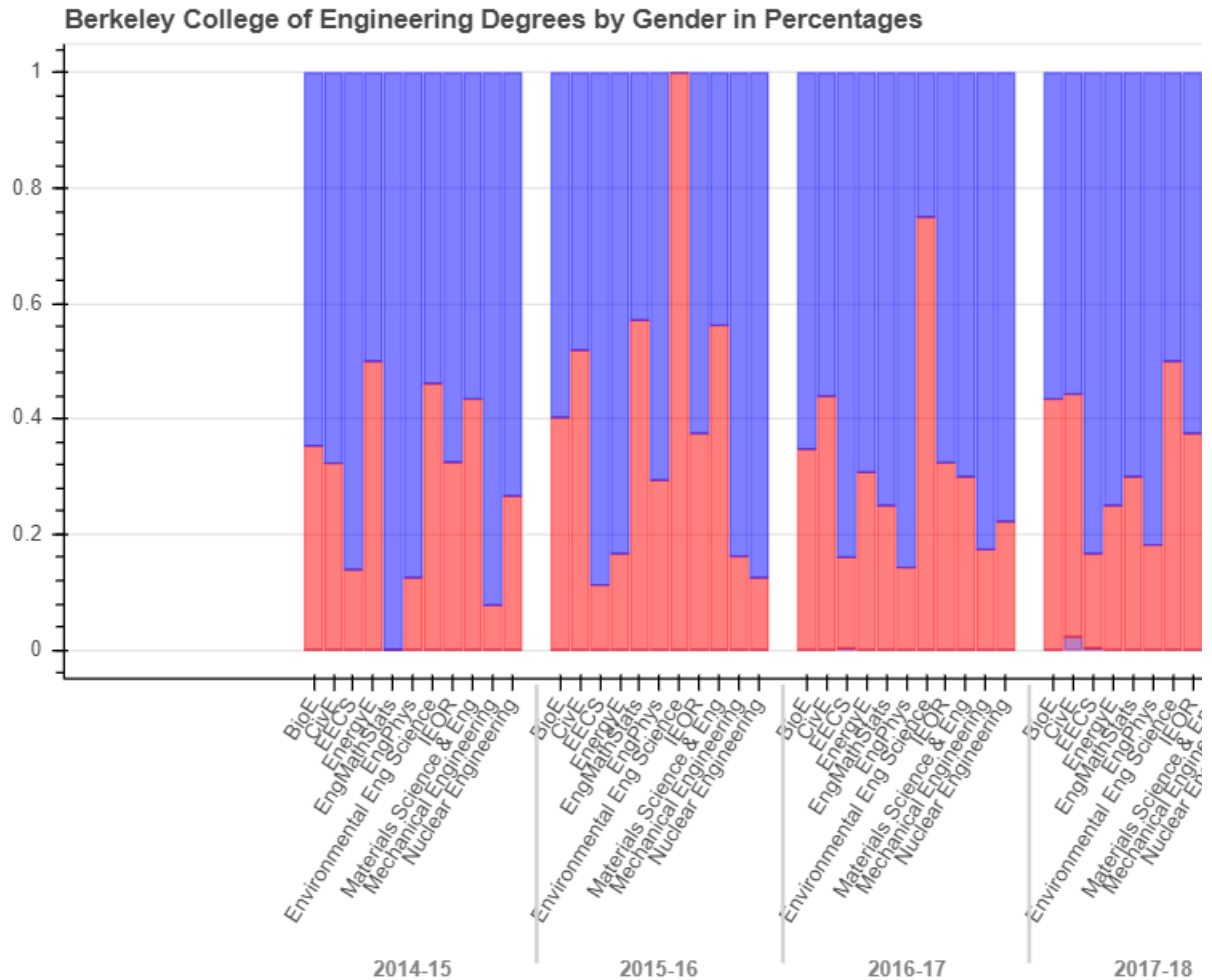

```
In [2]: IFrame('coe_18.html', width=800, height=600)
```

Out[2]:

```
In [3]: IFrame(src='coe_18_percentages.html', width=800, height=525)
```

Out[3]:

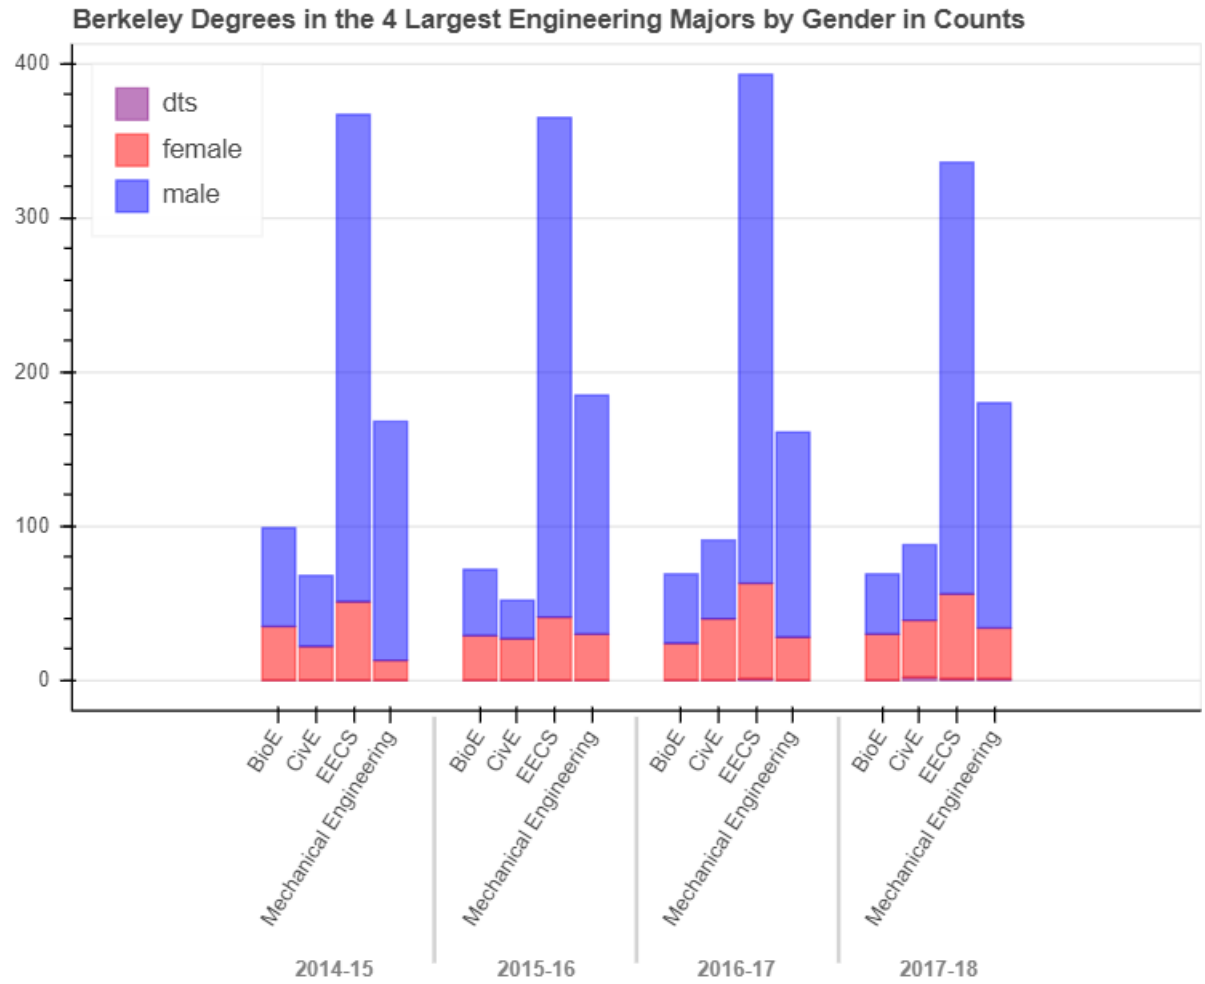

Let's take a closer look at the top 4 engineering majors. *EECS is by far the largest major, but it experiences the most gender disparity.* From 2012 to 2017, the proportion of female EECS majors increased from 13.9% to 16.4%.

Bioengineering and Civil Engineering are smaller majors, but have the most equal gender representation, with *Civil Engineering notably having 51.8% of their degrees be earned by women in 2015-16.*

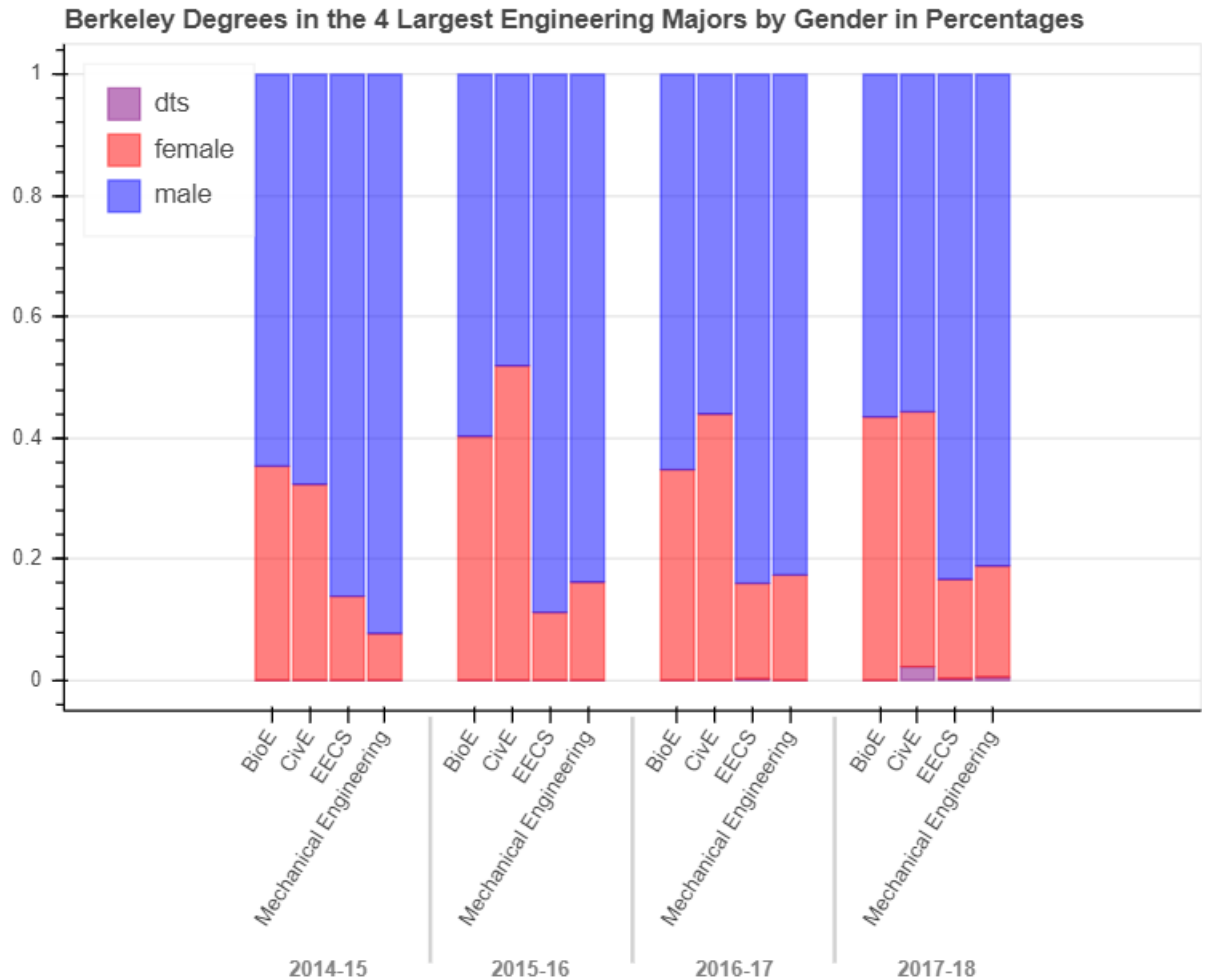

```
In [4]: IFrame(src='four_18.html', width=800, height=525)
```

Out[4]:

```
In [5]: IFrame('four_18_percentage.html', width=800, height=525)
```

Out[5]:

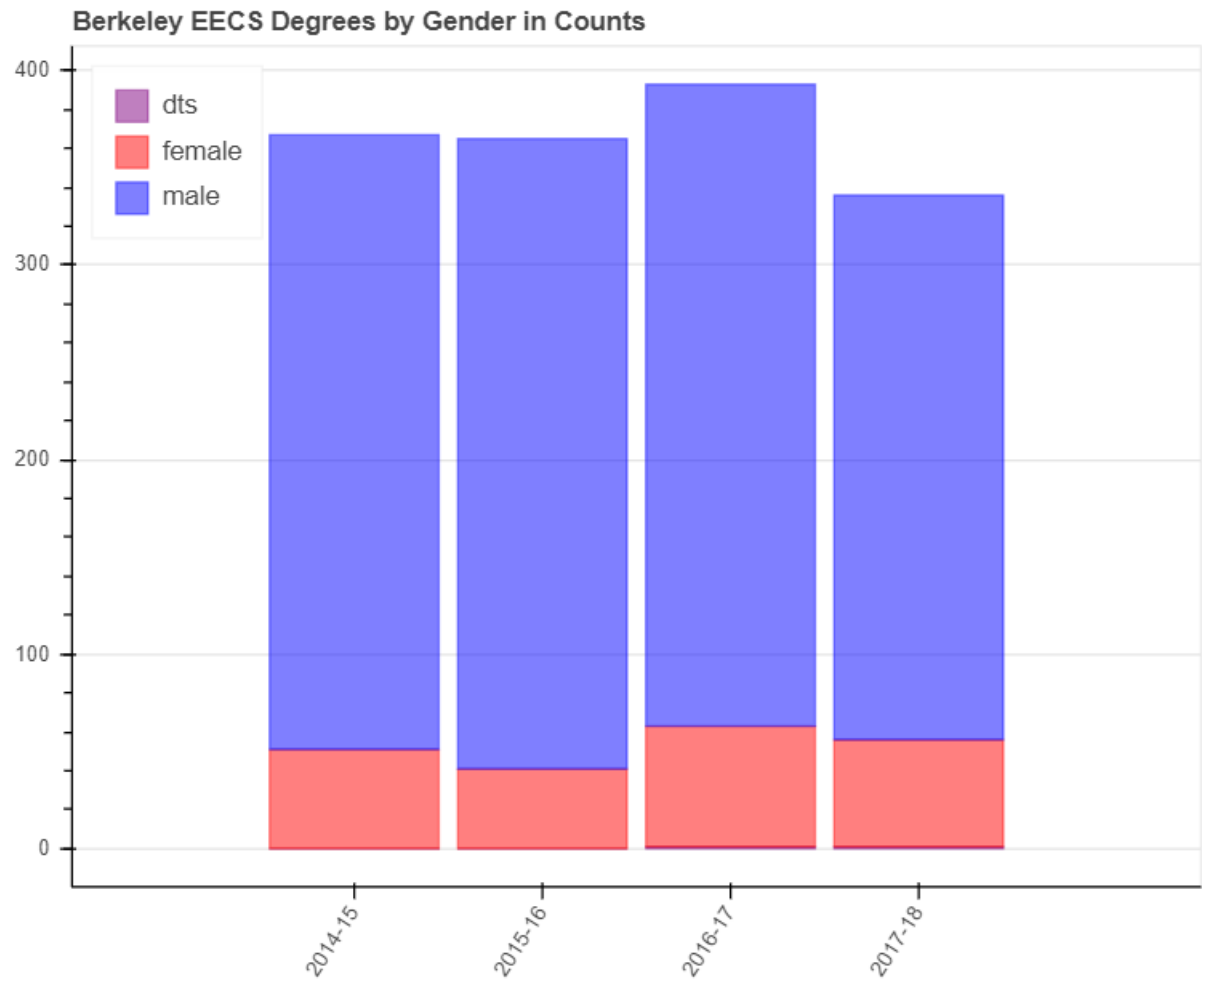

"What is the proportion of bachelor's degrees earned by women in EECS?"

Overall, the proportion of EECS bachelor's degrees earned by women is very small, averaging to be around 14.3% across the past four years. The percentage has increased by 3% from 2012-13 to 2017-18.

"How many female Engineering/CS degrees earned by women in all of UC? How does Berkeley compare?"

- Raw Data Source (<https://www.universityofcalifornia.edu/infocenter/degrees-awarded-data>)

The percentage of Engineering and CS female graduates in UC overall hovers around 20% to 30% range. Berkeley notably has more equal gender representation (as far as a 7% difference) compared to UC overall across undergrad, masters, and doctorate levels and across all years (besides two years at the PhD level, **bolded below**), with the highest levels of equality (avg 31.45%) occurring at the master's level.

Group	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18
UC Undergrad Eng/CS Females	19.4%	20.5%	20.1%	22%	21.5%	22.8%
Berkeley Undergrad Eng/CS Females	20%	22.1%	20.9%	23.3%	24%	25.3%
UC Masters Eng/CS Females	23.8%	25.5%	26.2%	27.1%	27.5%	28.1%
Berkeley Masters Eng/CS Females	30.5%	31.7%	29.8%	30.6%	32.1%	34%
UC Doctorate Eng/CS Females	21%	22.1%	21.3%	22%	26.3%	23.8%
Berkeley Doctorate Eng/CS Females	20.3%	19.6%	23.5%	18.8%	30%	27.5%

"In what industries are UC engineering/CS graduates working?"

- [Original Interactive Visualization \(https://www.universityofcalifornia.edu/infocenter/uc-stem-degree-pipeline\)](https://www.universityofcalifornia.edu/infocenter/uc-stem-degree-pipeline)
- [More Information on UC STEM Degree Production \(https://www.ucop.edu/institutional-research-academic-planning/_files/stem_degree_brief.pdf\)](https://www.ucop.edu/institutional-research-academic-planning/_files/stem_degree_brief.pdf)

The top 4 industries for UC engineering and CS bachelor graduates in descending order are 1) Manufacturing, 2) Internet and Computer Systems, 3) Other Industries, and 4) Engineering Services.

However, the top 3 industries for UC engineering and CS masters and doctorate graduates in descending order are 1) Manufacturing, 2) Engineering Services, and 3) Internet and Computer Systems.

Almost a quarter of doctorate graduates remain in higher education within the first 2 years after graduation.

Below are visualizations for Bachelor's, Master's, and Doctorate graduates (in that order).
